PROFESSIONAL SUMMARY

Game Designer with 5+ years in mobile/live operations, including unit design and content delivery for *FINAL FANTASY BRAVE EXVIUS Global*. Led a three-person rapid-prototyping and testing team at Century Games. Independently deliver combat/economy balance, design specifications, data configuration and QA; use AI tools to accelerate prototyping and checks with manual verification. Experienced coordinating fixed-release dependencies and shifting prototype priorities.

CORE CAPABILITIES

Live operations & planning: JP-to-Global unit adaptation; recurring content, integration/QA, release dependencies and changing work priorities.

Independent design: Unit/skill kits, combat and progression balance, GDDs, Excel/Sheets, SQL/MySQL, builds and playtesting.

AI workflows: ChatGPT/Codex browser prototypes, CSV/JSON/spreadsheet validation, manual checks of numerical logic and edge cases.

Languages: English and Mandarin Chinese

PROFESSIONAL EXPERIENCE

May 2025 - Nov 2026

Game Designer
Century Games

- Led a three-person cross-functional team responsible for rapid prototyping and testing new mobile game concepts, coordinating design, programming and art through short iteration cycles.
- Planned short prototype iterations, set implementation priorities and review checkpoints, and re-sequenced design, programming, art and testing work as requirements and playtest findings changed.
- Owned the core loop, stage/difficulty structure, progression, power-up rules and data setup of a cooking-themed mobile puzzle prototype.
- Independently balanced RPG/auto-battler combat and idle/tycoon economies: unit strength, enemy curves, income, upgrade costs and rewards; reviewed CPI tests and competitor builds.
- Used ChatGPT/Codex to accelerate browser-based design prototypes, spreadsheet/CSV/JSON checks, build comparisons and repeatable QA; manually reviewed assumptions, formulas and edge cases.

Oct 2020 - Jul 2024

Game Designer - FINAL FANTASY BRAVE EXVIUS (Global)
Gumi Asia

- Designed and balanced playable unit kits, stats, skills, roles and combat interactions, including adaptation of Japan-origin units for Global release.
- Supported recurring live-service delivery from design/configuration data and implementation checks through integration testing, issue resolution and release validation.
- Coordinated concurrent, fixed-schedule content deliverables and implementation dependencies with internal teams and Square Enix; helped address schedule-sensitive changes and blockers.
- Maintained unit and balance data using Excel, Google Sheets and SQL/MySQL; checked release configuration through spreadsheet/SQL workflows and manual review.
- Investigated player/Customer Support issues, checked live-service data and builds, communicated corrections and verified fixes.

Jan 2020 - Jul 2020

Game Design Intern - Adventure Time Heroes
goGame Pte Ltd

- Tested gameplay builds, documented reproducible defects and prepared balance sheets, competitor research, UI flowcharts and feature mockups.

EDUCATION

Aug 2016 - Aug 2020

Bachelor of Arts in Game Design
DigiPen Institute of Technology (Singapore)

Apr 2011 - Mar 2014

Diploma in Mechatronics Engineering
Nanyang Polytechnic (NYP)
